

## *About The Speaker*

**Cortnee Roman, MSN, FNP-BC** is a nurse practitioner at the Rocky Mountain Multiple Sclerosis Clinic where she diagnoses and manages the care for patients with MS and other neurological conditions. In addition to serving as the RMMSC's community liaison and patient education specialist, Cortnee supervises the facility's large internal infusion clinic.

Since becoming a nurse practitioner in 2009, Cortnee has specialized in neurology cases, empowering patients to live their best lives by providing education and services, and by blending the latest ground-breaking treatments with naturopathic and alternative remedies. She serves as a Clinical Trial Investigator in pharmaceutical clinical trials as well as an internal investigator-initiated studies. In addition, prior to joining RMMSC, Cortnee was the Director of Research at Western Neurological Associates.

Her high-level research and investigative work have given Cortnee an unsurpassed understanding of how MS responds to the new therapeutics now reaching the market. For this reason, she is suddenly in high demand as a public speaker.

Cortnee received Bachelor's degrees in biology from Southeastern University in Lakeland, Florida, and in Nursing from Columbia University in New York, New York in 2007. While working as a registered nurse at New York Presbyterian Weill Cornell Medical Center, Cortnee completed her Master's degree at Columbia, and received her Family Nurse Practitioner's license in 2009. She lives in Salt Lake City, Utah.
