

FOR ANYONE WITH RELAPSING MS

# DOES YOUR TREATMENT MATCH YOUR UNIQUE NEEDS?

Our free live event **Considerations for Finding Your Fit** may help you know

There is no one exactly like you, which means you have unique needs. Join us for a free live event to hear from an **MS expert** about how understanding and identifying your unique needs can help you and your healthcare provider find the right relapsing MS treatment for you. We'll also discuss AUBAGIO® (teriflunomide), a once-daily pill that may be the right fit for your relapsing MS.

### SPEAKER

Beverly Gilder, MD  
Littleton, Colorado

### INDICATION

AUBAGIO® (teriflunomide) is a prescription medicine used to treat relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.

### IMPORTANT SAFETY INFORMATION

Do not take AUBAGIO if you have severe liver problems, are pregnant or of childbearing potential and not using effective birth control, have had an allergic reaction to AUBAGIO or leflunomide, or are taking a medicine called leflunomide for rheumatoid arthritis.

Please see Important Safety Information on the next page, and the accompanying full [Prescribing Information](#), including boxed **WARNING** and [Medication Guide](#).
