

☀️ OCREVUS is a 2-times-a-year* prescription infusion for adults with relapsing or primary progressive forms of MULTIPLE SCLEROSIS ☀️

Dear MS,
Meet ☀️ 2-times-a-year ☀️
OCREVUS.

HANNAH, USING OCREVUS,

SINCE 2018

*Your first dose will be split between two treatments, for a total of three treatments your first year.

☀️ **If you or someone you care about has Relapsing Multiple Sclerosis (RMS) or Primary Progressive Multiple Sclerosis (PPMS), we invite you to a free online educational event.**

Learn more about treating Relapsing MS (RMS) and Primary Progressive MS (PPMS) from an MS expert

Discover why OCREVUS may be the right choice for treating Relapsing MS (RMS) and Primary Progressive MS (PPMS)

Once registered, you will be emailed a link to join the program.

What is OCREVUS?

OCREVUS is a prescription medicine used to treat:

- Relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults
- Primary progressive MS, in adults.

It is not known if OCREVUS is safe and effective in children.

Who should not receive OCREVUS?

Do not receive OCREVUS if you have an active hepatitis B virus (HBV) infection.

Do not receive OCREVUS if you have had a life-threatening allergic reaction to OCREVUS. Tell your healthcare provider if you have had an allergic reaction to OCREVUS or any of its ingredients in the past.

Please see additional Important Safety Information on back and see accompanying full Prescribing Information and Medication Guide or visit www.OCREVUS.com.

INDICATIONS AND IMPORTANT SAFETY INFORMATION

What is OCREVUS?

OCREVUS is a prescription medicine used to treat:

- Relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults
- Primary progressive MS, in adults.

It is not known if OCREVUS is safe and effective in children.

Who should not receive OCREVUS?

Do not receive OCREVUS if you have an active hepatitis B virus (HBV) infection.

Do not receive OCREVUS if you have had a life-threatening allergic reaction to OCREVUS. Tell your healthcare provider if you have had an allergic reaction to OCREVUS or any of its ingredients in the past.

What is the most important information I should know about OCREVUS?

OCREVUS can cause serious side effects, including:

• Infusion reactions:

Infusion reactions are a common side effect of OCREVUS, which can be serious and may require you to be hospitalized. You will be monitored during your infusion and for at least 1 hour after each infusion of OCREVUS for signs and symptoms of an infusion reaction.

• Infection:

- OCREVUS increases your risk of getting upper respiratory tract infections, lower respiratory tract infections, skin infections, and herpes infections. Infections are a common side effect, which can be serious. Tell your healthcare provider right away if you have an infection. Your healthcare provider should delay your treatment with OCREVUS until your infection is gone.
- **Progressive Multifocal Leukoencephalopathy (PML):** Although no cases have been seen with OCREVUS treatment in clinical trials, PML may happen with OCREVUS.
- **Hepatitis B virus (HBV) reactivation:** If you have ever had hepatitis B virus infection, the hepatitis B virus may become active again during or after treatment with OCREVUS. Hepatitis B virus becoming active again may cause serious liver problems including liver failure or death.
- **Vaccinations:** Tell your doctor about any recent or upcoming vaccinations.
 - You should receive any required 'live' or 'live-attenuated' vaccines at least 4 weeks before you start treatment with OCREVUS.
 - When possible, you should receive any 'non-live' vaccines at least 2 weeks before you start treatment with OCREVUS.
- **Weakened immune system:** OCREVUS taken before or after other medicines that weaken the immune system could increase your risk of getting infections.
- **Decreased immunoglobulins:** OCREVUS may cause a decrease in some types of immunoglobulins. Your healthcare provider will do blood tests to check your blood immunoglobulin levels.

What are the possible side effects of OCREVUS?

OCREVUS may cause serious side effects, including:

- **Risk of cancers (malignancies) including breast cancer.** Follow your healthcare provider's instructions about standard screening guidelines for breast cancer.

These are not all the possible side effects of OCREVUS.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088. For more information, go to www.OCREVUS.com or call 1-844-627-3887.

For additional safety information, please see the full Prescribing Information and Medication Guide.
