

Andrew Wolf, MD

Assistant Professor of Neurology

UNIVERSITY OF COLORADO NEUROSCIENCE CENTER,
ANSCHUTZ PAVILLION

Dr. Andrew Wolf attended medical school at the University of Colorado Denver School of Medicine, and completed Residency and Fellowships at the University of Colorado. His research interests are focused on improving the treatment of patients with multiple sclerosis and other inflammatory diseases of the central nervous system.

Current projects Dr. Wolf is working on include developing digital and blood biomarkers to detect worsening in multiple sclerosis patients, characterizing clinical outcomes of neuroinvasive West Nile virus infection in patients on anti-CD20 treatments, and understanding the risks of immune checkpoint inhibitor use in patients with neuroimmunological disease. He is also interested in the acute management of demyelinating diseases and optimizing inpatient to outpatient care transitions.
