

Robert Gross, MD

Dr. Robert Gross attended college at Columbia University and medical school at NYU School of Medicine. He completed his Internship in Internal Medicine and Residency in Adult Neurology at Brown University in Providence. He then returned to New York to complete a fellowship in Multiple Sclerosis/Neuroimmunology at the CGD Center for MS at Mount Sinai Hospital.

Dr. Gross sees patients with MS and related disorders of the central nervous systems. He divides his time between patient care, teaching, and clinical research. Research interests include the identification of biomarkers associated with treatment response in MS and the establishment of prospective databases to aid in prognostication.

Recently having moved to Colorado with his wife and beagle/terrier puppy, Dr. Gross is thrilled to be living out West for the first time.
